**DETAILED ACTION*****REASONS FOR ALLOWANCE***

1. The following is an examiner's statement of reasons for allowance: The instant invention is a method of sharpening a digital image having image pixels according to its material content. Prior art was found for the steps of generating a subject matter belief map corresponding spatially to the image pixels, having belief values indicating the likelihood that respective image pixels are representative of a particular subject matter (US 6,738,494). Prior art was found for a noisy pixel belief map corresponding spatially to the image pixels having belief values indicating the likelihood that the modulation about respective pixels are due to system noise (US 6,118,906). Applicant uniquely claimed a distinct feature in the instant invention, which are not found in the prior art, either singularly or in combination. The feature is a gain map from the subject matter belief map and the noisy pixel belief map having gain values that indicate the degree of sharpening to be applied to the image pixels. This feature is not found or suggested in the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Claims 1-6 are allowed.
